

Poster Pack Tractor

What you'll do:

Step 1: Cut out the tractor pieces, making sure to leave a large margin.

Step 2: Use spray adhesive to mount each tractor piece on foam core.

Step 3: Trim the edges of each tractor piece. Some edges will be trimmed off and have no margin so that they fit together seamlessly with the next piece. For the outer edges of the tractor, leave a large margin of white. Be sure to match the pieces and trim the seams at the same time so that the edges match.

Step 4: Lay out all the tractor pieces so that they fit snugly to one another like a finished puzzle. Check to be sure the seams are all trim, and fix any seam that needs adjustments.

Step 5: Flip the pieces over facedown and snug together.

Step 6: Tape to secure pieces in place before gluing.

Step 7: Hot glue wide scraps of foam core over each seam the entire length of the seam.

Step 8: To provide added strength and ensure the tractor top does not flop over, hot glue vertical struts of foam core to the back.

Step 9: An easel back can be added to help the tractor stand. Cut out a triangle, score the edge, bend at the score, and glue it on. white paper, white duct tape, or foam core. Secure to the ladder with tape.

Supplies

- ▶ utility blade
- ▶ cutting mat
- ▶ straight edge
- ▶ foam core or cardboard
- ▶ Giant Decorating Poster Pack
- ▶ scissors
- ▶ spray adhesive
- ▶ hot glue gun
- ▶ dropcloth
