

Windmill Instructions

What you'll do:

Step 1: Spray paint the ladder white.

Step 2: Cut out the windmill face pieces and blades from the poster pack, leaving a 1" margin around each piece.

Step 3: Mount the pieces of the windmill on foam core. (Spray the back of each poster piece with spray adhesive and press it onto foam core.)

Step 4: Use a utility knife and a straight edge or yardstick to cut out each mounted piece.

Step 5: To assemble the windmill face, follow the layout and instructions provided in the poster pack. Use hot glue to secure each blade to the circle.

Step 6: Cover a 16" length of poster tube or carpet tube with white paper. Drill two holes 4" from each end, large enough for a zip tie to pass through the carpet tube.

Step 7: Center the tube onto the back side of the windmill face, and secure using hot glue.

Step 8: Hot glue the tail piece of the windmill top to the carpet tube.

Step 9: To create the cross pieces and horizontal pieces of the windmill base, cut 1½" wide pieces of white paper, white duct tape, or foam core. Secure to the ladder with tape.

Step 10: Attach the top of the windmill to the ladder by threading zip ties through the holes and zip tying to the top, flat part of the ladder. Be sure before pulling zip ties tight that the logo is facing up and in the right position. For added stability, tape may also be used over the zip ties.

Supplies

- ▶ 8-foot ladder
- ▶ white spray paint
- ▶ dropcloth
- ▶ gloves
- ▶ Giant Decorating Poster Pack
- ▶ scissors
- ▶ white foam core
- ▶ white duct tape
- ▶ white paper
- ▶ utility knife
- ▶ straight edge/yardstick
- ▶ cutting mat
- ▶ spray adhesive
- ▶ hot glue gun and glue
- ▶ 4 zip ties, 11" long
- ▶ 16" length of poster tube or carpet tube
- ▶ drill with drill bit
