

1

Set up the **easel** by folding the sides 90° and securing sides with locking wing tabs. Fold the top 2 flaps down so they overlap.

2

Attach the **mountain base** to the easel with 4 bolts. The lowest hole in the **easel** remains unused in this step.

3

Attach the angled **support bracket** with one bolt to the lowest hole on the **easel**. This bracket will be finished in a later step.

4

Attach the **letter backdrop** to the **mountain base** with two upper bolts.

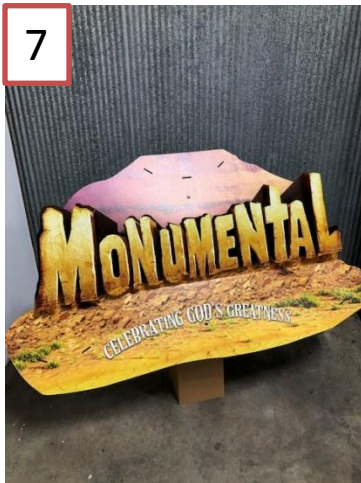

5

Insert the third bolt in the center of the **letter backdrop** to connect it to the **support bracket** underneath.

6

Connect the "MONUMENTAL" **letters** by folding the side panels 90° and pushing the lock tabs into the corresponding slots on the **letter backdrop**.

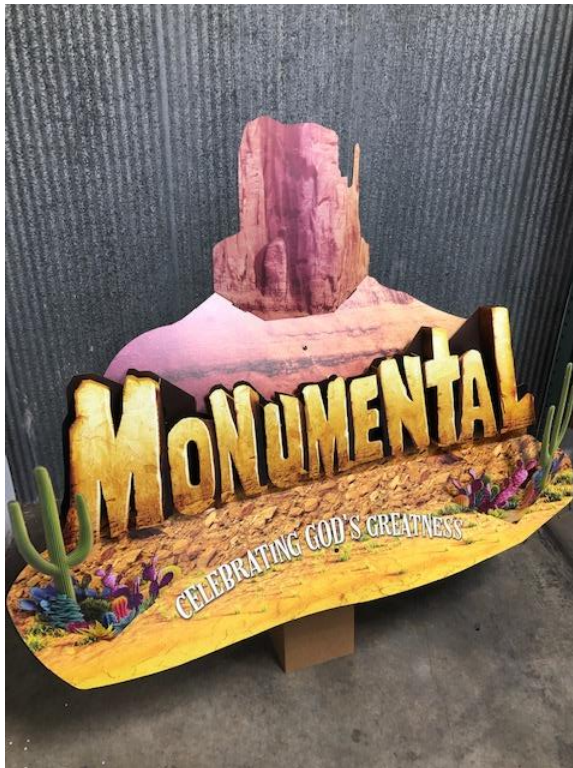

Repeat the previous steps to place the remaining letters onto the background.

Attach the **mountain top** to the **mountain base** by folding the side panels 30° and pressing 3 locks into the slots.

Place the **cactus** by bending the seam in the middle and pushing 2 locks into the slots. Repeat for the **cactus** on the opposite side.

Place the completed display on an even surface, or tear off the bottom portion of the easel and hang the display from the provided hanger holes.
